ROMH

Self Developed : AI-Powered Telegram Outage Follow-up Initiative

PROBLEM STATEMENT (BEFORE AUTOMATION)

- Outage updates coming in GNOC group → No tags to Field team.
- Critical alerts getting ignored or delayed.
- No accountability tagging.
- Follow-ups depend on manual effort.
- Result → Delayed response & outage visibility gaps.

OUR SOLUTION

Built an AI-powered Telegram Automation Bot

- Filters raw GNOC messages
- Identifies critical outages automatically
- Sends structured alerts instantly
- Performs real-time tagging of responsible person
- Tracks outage lifecycle (Running → Follow-up → Restored)

KEY BENEFITS

- Zero Delay Visibility**
Eliminates hour-level reporting gaps
- Real-Time Action Trigger**
Tagging = equivalent to direct call-out
- 100% Outage Coverage**
Ensures no outage gets missed
- Continuous Tracking**
Tracks outage lifecycle until closure

IMPACT SNAPSHOT

- Delay Reduced**
~90%
- Missed Outages**
→ 0
- Response Time**
Significantly Improved
- Team Efficiency**
High

DELAY REDUCED
90%+
Near Real-Time Alerts

MISSED OUTAGES
0
100% Coverage

RESPONSE TIME
Significantly Improved

TEAM EFFICIENCY
High
No Manual Tracking

LIVE BOT ALERTS (REAL EXAMPLES)

CRITICAL OUTAGE
Instant Alert & Tagging

FOLLOW-UP
Auto Follow-up Until Closure

OUTAGE RESTORED
Closure Alert with Details

Raw message from GNOC is auto-filtered by AI Bot and converted into actionable alert with tagging & tracking.

HOW IT WORKS

WHY IT MATTERS

From reactive outage tracking to proactive, AI-driven real-time action system.

2nd AUTOMATION SOLUTION

AI-Powered Critical Incident Monitoring & Proactive Incident Automation

PROBLEM STATEMENT (BEFORE AUTOMATION)

- Critical fiber incidents identified manually through data dump every 3 hours.
- Service affecting NSA incidents not visible in real-time.
- One full-time resource required to filter, identify & share updates.
- Delayed visibility to leadership and area owners.
- High dependency on manual follow-up.
- Risk of missing critical issues and delayed escalation.

OUR SOLUTION

Built an AI-powered Critical Incident Monitoring Bot

- ✓ Auto-capture raw incident updates from NOC/Remedy.
- ✓ Identify & track critical NSA incidents in real-time.
- ✓ Create area-wise pending incident dashboard.
- ✓ Send actionable alerts & reminders automatically.
- ✓ Publish leadership dashboard every 2 hours.
- ✓ Auto generate Excel backup for audit & reporting.

KEY BENEFITS

- Real-Time Visibility**
Early detection of critical incidents
- Automated Reminders**
Timely follow-up until closure
- Proactive Monitoring**
Service affecting risk identified early
- Leadership Dashboard**
2 hourly executive updates

IMPACT SNAPSHOT

- Delay Reduced**
~90%
Near Real-Time Alerts
- Missed Critical Incidents**
0
100% Coverage
- Response Time**
Significantly Improved
Early Action Enabled
- Team Efficiency**
High
No Manual Effort

HOW IT WORKS (END-TO-END FLOW)

REAL-TIME VISIBILITY
100%
Near Real-Time Incident Visibility

MISSED CRITICAL ALERTS
0
100% Coverage of Critical Incidents

RESPONSE TIME
Significantly Improved
Early Action Enabled

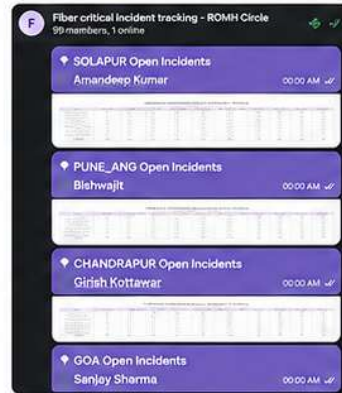

TEAM EFFICIENCY
High
No Manual Tracking or Filtering

HOW THE 2nd AUTOMATION WORKS

LIVE BOT ALERTS (EXAMPLES)

- New Critical Incident**
Instant Alert Sent
- Reminder Alert**
Auto Follow-up (15-30 Min)
- Restoration Alert**
Incident Closed Update

EXAMPLE: AREA-WISE OPEN INCIDENT SUMMARY

Open Incident Summary (15-Jun-26 12:00 AM)

Area	RF <4	RF >4	LCF <4	LCF >4	SI <4	SI >4	CRI <4	CRI >4	MS <4	MS >4	SEC <4	SEC >4	GT <4	GT >4	Total
KOLHAPUR	0	1	0	0	0	0	0	2	0	2	2	3	2	8	10

Total	0	2	0	0	0	0	8	8	5	27	7	23	12	60	72

AUTO OUTPUTS GENERATED

- EXCEL BACKUP**
Daily automated Excel with all open incident details.
- DASHBOARD PUBLISH**
Area wise dashboard shared in operational group.
- 2 HOURLY LEADER UPDATE**
Executive summary posted every 2 hours in leadership group.
- ESCALATION ALERT**
Auto escalation for incidents breaching TAT (> 4 Hrs.).

WHY IT MATTERS

From reactive outage tracking to proactive, AI-driven real-time action system.
